

10.2" Digital Photo Frame

The Shintaro 10.2" Digital Photo Frame allows a constant stream of photos, video and sound. You no longer need a PC to view your digital media; simply insert your USB Pocket Disk, or Memory card and begin enjoying your high resolution digital memories immediately. The 256MB internal memory allows you to upload your most cherished memories directly to the photo frame. The Shintaro 10.2" Digital Photo Frame features added video playback, auto picture rotate, and a power saving motion sensor, which allows the Photo Frame to return to standby mode conserving power whilst no one is nearby. An excellent all-round media player, suitable for public display, education, promotion or the power conscious home user.
