

# 8" Weather Station Photo Frame

Product Code: SHDPF8W

The Shintaro 8" Weather Station Photo Frame plays videos, pictures and sound but also contains a built in weather station. Both the temperature inside and out are displayed with minimum and maximum temperatures for the day displayed. A sensor wirelessly communicates the data from outside to the photo frame and the same device acts as a barometer to predicts future weather patterns. You'll never be caught out in the rain again.

No longer is a PC needed to view your digital photos and video; simply insert your SD, MMC, MemoryStick, pick your preferred viewing angle, either vertical or horizontal, and begin enjoying your multimedia right away
