

Portable HDD Copy Station

The Shintaro Portable Hard Disk Duplicator allows you to copy the contents from your Hard Disk to another, without a PC and at the simple push of a button. There's no easier way to upgrade your hard drive to a larger capacity for upgrades. It features a built in LCD display with an easy to use menu system and caters for both the 2.5" and 3.5" sizes in both PATA and SATA connection types. It can also be used as an external storage device with RAID features making this a truly versatile device.
