

Wireless Keyboard

Product Code: SH-KEYRF

The Shintaro Wireless Multimedia Keyboard features an ergonomic hand held design that allows it to sit comfortably either on a desktop or in your lap, which means you can leisurely operate any PC from the comfort of your favourite arm chair.

With a 15m range, distance is never a problem, and setup is as simple as plugging the small transmitter into a spare USB port. After sampling one of these fully featured keyboards with trackball and optical mouse technology built in, you'll never want to be tied to your desk again
